Final Conclusion

Genuine & Latest USDW Smart Contracts (Base Chain)

This is the only USDW system that is live, wired, and authoritative on Base.

🧠 Core Controller

USDW_Main

- **Proxy (LIVE):** 0x661461d7c1d4f7cb591016A958959bbCB36457f9
- **Implementation (LIVE):** 0x4f4a03CcbeB73f53e5c61d12bbfF21153DB4D4F4

> 🗔 ✅ All module getters resolve from this proxy
> ✅ This is the contract all integrations must use

🔗 Active Module Proxies Wired Into USDW_Main

These addresses were **confirmed via USDW_Main getters** and are the **only modules the system recognizes**.

Storage	Core Logic	Price Module
0xE2aF352B1FA9D0335963c69fee0fd3FA162A60be	0x1C1e2C78DFc1aF43d9Bc6bAcC454822C4467A177	0x88329a78d463F0Ae1F4093cf05F170A4E4B3094c

Fiat Ledger	Fiat Redeem	Fiat Reserve
0x39C5e9294409502588adD96d7cEdBfa580A7f296	0x6470d16b6131A1AAA2F9dd1ddB0756D1E3b90c85	0x74D21b9095c06292844A7A2DCedD30244B033f50

🔐 Governance & Control

Roles Module

0xc5F209aE865A73E44e667C80e53D3eBbDDD2502f

> ☑️ All roles assigned
> ☑️ UPGRADER_ROLE verified
> ☑️ No orphan or shadow RolesModules in use

🛡️ Compliance & Security

Compliance Module

0x7734602226F5d943F150DbfBFB212D02c9e794dD

Security Module

0x7E4061e51478F142Dc14CE02431e8CA652B694Cf

> ☑️ Enforcement modules active
> ☑️ Pause / guardian paths intact

📊 Proof-of-Reserves (PoR)

PoR Oracle Module

0x2B7D5dd02fa0fE9EfF5E57462ef12B5E8d8E505d

PoR Audit Module (wired into USDW_Main)

- **Proxy:** 0x9a99FD85D1971804d1F29A2Cf4A6f3bC449AC54F

> ☑️ This is the **only** PoRAudit module used by USDW_Main
> ☑️ Earlier PoRAudit deployments are **not active**

📸 Snapshot Oracle (PoR Infrastructure)

(Referenced by PoR modules, not directly by USDW_Main)

- **Proxy:** 0x2179D76eD731a466b69714905E0AA7820550C92A
- **Implementation:** 0x323d549547f10496c4402f17b82d7b031f0a377d

> 🗒️ ✅ ERC-1967 proxy confirmed
> ✅ PoROracleModule authorized
> ✅ Attestor & Guardian set

🧾 What Is **NOT** Canonical

The following are **not** part of the live USDW system:

- Old USDW_Main proxies (0x9B70…, 0x9BF8…)
- Previous module proxies deployed during testing
- Earlier PoRAudit deployments
- Any RolesModule not equal to 0xc5F209aE865A73E44e667C80e53D3eBbDDD2502f

They may exist on-chain, but **USDW_Main does not reference them**.

✅ Final Authoritative Statement

> **The genuine and latest USDW deployment on Base is anchored at USDW_Main (proxy) 0x661461d7c1d4f7cb591016A958959bbCB36457f9, and only the module addresses listed above are active and trusted.**

This is the system you should:

☐ **Integrate with**	☐ **Present to auditors**
☐ **Use for governance activation**	☐ **Publish in documentation**
